

“Thought you might like to hear of one success story from my school.

A Year 5 boy with particularly bad coordination problems affecting his handwriting (his writing was more like a 5 year olds) and thus all his written work, has dramatically improved his handwriting since starting the Fun Fit programme in April. His literacy score in optional SATs has jumped from from 2a last summer to 3a this summer.(i.e. 2 years progress in 1 year!). Also he has gone from well below average to the level expected for his age. Brilliant!!!”

“Reports from the schools using the programme are very positive in the Tavistock area, and several people have remarked how much the children are enjoying it.”
